Kokio darbo ieškau? Mano teigiamos savybės

DEARHIRING MANAGER,

If i may introduce myself in a quick glance, I have completed my Bachelor's degree in Mechatronics Engineering and currently looking for a full time job in order to start my career.

Your selection criteria stipulate that candidate should have experience in Technical work. I worked as a technical field engineer for 7 months. My training includes running test and risk analysis to search for potential problem that new processes may have and to come up with a solution if any issues are found. It also includes monitoring and assisting with the implementation of newly approved project.

Furthermore, working as an Intern, I have handled operations that were tricky and challenging. I always made sure I give my best in every task I took over. My decision-making skills has improved a lot working in this position and I am also capable to handle work under stress and within deadlines and good in multitasking. Investigating issues and coming up with solutions which benefits both the parties at work.

Will be attentive to your thoughts. Good Day!

Sincerely,

Buvanesh Kalainamby Rathikathevi
