Kokio darbo ieškau? Mano teigiamos savybės

I am a highly experienced professional with 11 years of expertise in the field of Telecommunication OSP/ISP. Throughout my career, I have developed a strong proficiency in various areas, including fiber optics, structured cabling, and security systems. My skills extend to the implementation, installation, and support of telecom, data, security systems, and network communication.

I possess a deep understanding of the complexities involved in deploying and maintaining telecommunication infrastructure. With my extensive knowledge in fiber optics, I have successfully implemented robust and efficient communication networks. My expertise in structured cabling ensures the seamless integration of various systems, facilitating smooth data transmission and communication.

In addition to my core competencies, I am familiar with cutting-edge technologies that are driving the telecommunications industry forward. I have a solid understanding of cloud computing, which offers scalable and flexible solutions for modern communication needs. My certification as a CCNA demonstrates my proficiency in network administration and troubleshooting. Furthermore, I am knowledgeable in ACCESS and DATA COM systems, which are essential components of efficient data management and communication protocols.

I have also kept up with the latest advancements in the industry, including 5G and Wifi6 technologies. This knowledge allows me to contribute to the development and implementation of high-speed and reliable communication networks.

With my comprehensive skill set and years of experience, I am confident in my ability to contribute effectively to any organization in the telecommunications sector. I am dedicated, adaptable, and always strive for excellence in every project I undertake.
